

**ABSTRACT**

A connection wire **110** extends from an end of an induction coil **109**, along a surface of a base portion **104b** of a bobbin **104**, which surface is located close to a luminous bulb **101**. The connection wire **110** is separated from a sealing portion  
5 **118** of an inner tube **120** and an outer tube **119**.
